Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-24 and 29-33 are, drawn to a livestock pen, classified in class 119, subclass 502.
- II. Claims 25-28 are, drawn to a panel, classified in class 119, subclass 174.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a different type of tensioning member such as a pulley could be used. The subcombination has separate utility such as a dumpster.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Charles Cypher on March 11, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
